**DETAILED ACTION**

***Restriction/Election***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 (in part), 2-21, 63-97, drawn to benzoimidazoles (monomers) where **Q<sub>1</sub>-Q<sub>3</sub>** in Formula I are carbon atoms and **Q<sub>4</sub>** = nitrogen, classified in class 546, subclasses 193 and 199; and in class 548, subclass 307.4 and 306.1.
  - II. Claims 22-33, 98 (in part), and 104-106, drawn to benzopyrroles (monomers) where **Q<sub>1</sub>-Q<sub>4</sub>** in Formula I are carbon atoms, classified in class 546, subclass 200.
  - III. Claims 34-62, drawn to benzoimidazoles (dimers), classified in class 548, subclass 305.4
  - IV. Claims 1 (in part), 98 (in part), and 99-103, drawn to others, classified in classes 544, 546 and 548, subclass various

The inventions are distinct, each from the other because of the following reasons: Groups I-IV are directed to structurally dissimilar compounds such that the variable core created by the varying definitions of **Q<sub>1</sub>-Q<sub>4</sub>** in Formula I and **Q<sub>5</sub>-Q<sub>7</sub>** in compound Formula do not belong to the same recognized class of chemical compounds in the art, and references anticipating one invention, would not render obvious the others. Group I is drawn to a monomer of benzoimidazoles (benzene fused to 1,3-diazoles) and is different from Groups II-IV. Group II is drawn to monomers of benzopyrroles (benzene

Art Unit: 1624

fused to pyrroles) and is different from Group I and Groups III-IV. Group III is drawn to dimers of benzoimidazoles and is different from Groups I-II and Group IV, since this is not present in other groups. Group IV is drawn to others (e.g. purines, 1,2-diazine fused to diazoles, 1,3-diazines fused to azoles, triazines fused to 1,3-thiazoles, etc.) and is different from Groups I-III. Thus, separate searches in the literature as well as in the U.S. Patent Classification System would be required. Each group's compounds are made and used independently of each other and could support separate patents. The compounds differ significantly in chemical structures. One skilled in the art would not consider such diverse structure equivalents of each other.

If Group IV is elected; a tentative election of a single species is required.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Michael Straher on May 6, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1624

Applicants requested a written restriction requirement.

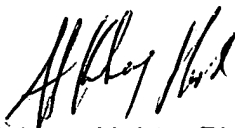

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
